Hydrocarbon Dry Cleaning Machine – Fully Automatic (Distillation Model with Inbuilt Dryer)

Complete Hydrocarbon Cleaning & Drying Solution

Product Detailed Description

The Launmark Hydrocarbon Dry Cleaning Machine – Fully Automatic Distillation Model is a high-performance, closed-loop solvent cleaning system designed for professional and large-scale dry cleaning operations.

Equipped with an integrated distillation unit and inbuilt dryer, this model ensures superior solvent purification, maximum recovery efficiency, and complete garment processing in a single machine — from washing to drying and deodorizing.

Engineered for fabric safety, operational efficiency, and environmental responsibility, this model is ideal for premium garment care businesses.

Product Highlights

1

Advanced Solvent Distillation System

Integrated distillation unit purifies used hydrocarbon solvent, ensuring maximum reuse and reduced operational cost.

4

Gentle Hydrocarbon Cleaning

Low mechanical stress protects delicate fabrics, colors, embroidery, and designer garments.

2

Fully Automatic Operation

PLC-based programmable cycles control washing, filtration, distillation, drying, and deodorizing automatically.

5

Vapor Recovery & Safety System

Sealed drum and vapor recovery technology reduce solvent loss and enhance workplace safety.

3

Inbuilt Closed-Loop Dryer

Integrated drying system ensures garments are dried safely inside the machine — no separate dryer required.

Installation Requirement

- * Install in a well-ventilated area with proper electrical connection.
- * Steam connection required for steam-heated models (if applicable).
- * Follow hydrocarbon solvent storage and safety guidelines.
- * No separate dryer required.

Launmark Industrial Standard

Developed under the guidance of Joby KM – The Laundry Man of India, the Launmark Fully Automatic Hydrocarbon Distillation Model delivers premium garment care performance, advanced safety, and long-term commercial reliability.
