The Launmark Automatic Steam Generator is a high-efficiency steam generation system designed to power multiple steam ironing units with consistent steam pressure and reliability. Built for industrial and commercial laundry operations, the machine is ideal for use with 2 iron boxes as standard, and can be extended to support up to 12 steam iron boxes based on requirement. With a customizable capacity ranging up to 100 kg/hour of steam output, this automatic boiler is essential for steam-based ironing operations across a wide range of professional applications, including garment manufacturing units, commercial laundries, dry cleaning centers, hotels, and uniform production facilities.

Automatic Steam Generator

Industrial-Grade Steam Generator for Ironing Solutions

Product Detailed Description

The Launmark Automatic Generator is constructed with heavy-duty steel and equipped with advanced auto water feeding, pressure control, and safety systems to ensure round-the-clock steam generation with minimal manual intervention. It comes in custom-built capacities, ranging from small units for 2 iron boxes to large systems capable of handling up to 12 units simultaneously. This fully automatic Machine maintains consistent steam pressure, enabling smooth and wrinkle-free ironing operations without interruption. Its compact design makes it suitable for both stand-alone use or integration into centralized ironing and finishing systems.

Applications for the Machine

The Launmark Automatic Steam Generator is widely used in:

Hotels & Hospitality Services

Ensures uninterrupted steam for uniform and linen ironing.

Garment Factories & Stitching Units

Powers multiple steam iron tables for high-volume output.

Commercial Laundries

Supplies steam for finishing operations and iron table usage.

Textile Training Institutes & Workrooms

Supports practical training with scalable steam output.

Dry Cleaners & Spotting Stations

Provides continuous steam for garment touch-up and pressing.

Uniform Production Units & Export Houses

Supports multiple stations for fast throughput.

Features of the Machine

Pressure Controller
Maintains optimal and consistent steam pressure.

Automatic Water Feeding System
Reduces downtime and manual refilling.

Supports Multiple Iron Boxes
Standard setup for 2 iron boxes, expandable up to 12.

High Steam Output Capacity
Customizable up to 100 kg/hr based on user needs.

Quick Start & Recovery Time
Rapid steam generation and recovery.

Low Fuel Consumption
Energy-efficient design reduces operational cost.

Advanced Safety Systems
Includes pressure relief valve, auto cut-off, and low water protection.

Compact Footprint
Easy to install and relocate within facilities.

Additional features of the Machine

1

Vertical or Horizontal Design Options

Depending on available space and application.

2

Fuel Options

Diesel, Gas, or Electric models available upon request.

3

Multi-Ironing Compatibility

Can be paired with Launmark steam press tables and finishing lines.

4

Control Panel with Indicator Lights

For water level, heating, and safety status.

5

Silent Operation

Designed for low-noise environments.

Key Role in the Industry:

The Launmark Automatic Steam Generator plays a critical role in ensuring continuous, high-pressure steam to power multiple ironing units in industrial environments. With modular capacity options and reliable automation, it boosts operational efficiency, minimizes manual intervention, and supports scalable laundry or garment operations. It is the backbone of any professional ironing system that requires dependable and uninterrupted steam flow.

Machine Summary

The Launmark Automatic Steam Generator is a powerful and flexible steam generation solution for multi-station ironing setups. With its customizable capacity, automation, and fuel options, it is ideal for businesses seeking reliable steam supply for 2 to 12 ironing units. Built for long-term industrial use, this machine offers safety, consistency, and efficiency—making it a key component of any professional laundry or garment processing facility.
